# Welcome to Freetrack

- Full real time GPS tracking with no subscription fee and no contract term
- Simply supply your own SIM card
- Ideal as a security device with car alarm activation (SOS) alert via SMS, phone call and push notification
- Supports multiple trackers - add as many trackers as you want on the one account
- 3G tracker hardware options for vehicles or other assets
- Everything is managed from the easy to use Freetrack app for iOS or Android
- Tracking data is based on **time interval and distance travelled** for accurate history playback (a vehicle can travel 800 metres every second)
- See the current location and status of your vehicle(s) on the one map
- Playback up to 6 months history
- Uses **Google maps** with Google maps functionality
- **Alerts** include:
  - Car alarm activation (SOS)
  - Geo-fence entry and/or exit
  - Overspeed
  - Tamper/power disconnect
  - Low tracker battery
  - Engine or ignition on/off
- **Customisable alert settings** including SMS or push notification as well as phone call for some events (including alarm activation)
- Low ongoing data cost + SMS / phone calls (if programmed on)
- Optional speed controlled fuel kill
- An **over the counter GPS tracking solution** - simply scan the barcode to add another tracker to your Freetrack account
- We recommend pairing with an **AVS car alarm** for a complete security package

# Freetrack GPS Trackers
